**SCOPE:** Approximately 3,500 square feet of floors polished to a 3,000 grit finish

**KEY PRODUCTS AND EQUIPMENT:** L&M Construction Chemicals FGS PermaShine system, Vivid Dye in American Rose, Black Diamond, Leather Brown, Desert Sand, River Blue and Kelly Green, and Petrotex

## Why the "Before" pictures don't matter anymore

**After DuraFloor:** Just 24 hours after the concrete DuraFloor repair, the floor was sealed and polished to this "like-new" condition. **Mission: Accomplished.**

**Before DuraFloor:** Years of wear and heavy use created extreme damage to this polished concrete floor. **Mission: Fix it overnight.**

Guess what: Customers don't pay you for what their floor looked like before you showed up. It's what the floor looks like after you leave that pays the bills.

**DuraFloor Overnight Concrete Repair** makes even the most severe concrete floor problems disappear and ready for sealing and polishing the next day. There's never been a quicker, easier, more flexible fix.

High Strength, Polishable, Self Leveling Overlay System with Extended Work Time

Only L&M's DuraFloor Overnight Concrete Repair Gives You All This:

- Polishable topping within 24 hours
- High abrasion resistance
- Can be dyed or colored
- Rapid strength gain
- Excellent bonding to sound concrete surface
- Interior and exterior use
